

RaphaelsMusik® as a companion

The love of God, our neighbor and of ourselves leads us into the unity of God. If our life is an expression of that love we will honor and appreciate the whole person with his body, his mind and his immortal soul. Every part of our human nature serves the unity in God. The body is a tool of energy and devotion. The mind is used to distinguish and for orientation. The soul serves as merger into the unity in God. RaphaelsMusik® is inspired music, spiritual music. It serves the coming to rest, inspiration and healing through the power of God. Raphael is one of the seven archangels. His name translates as "God heals". In the Book of Tobit, the angel Raphael is the companion of Tobias. Nevertheless, Raphael leads the seeker on his journey to the all-embracing love.

RaphaelsMusik® serves as our spiritual companion on our personal way to recognize and experience the healing power of love. This love can be experienced through dedication, drive and by the deliberate sinking of the spirit in God's eternal consciousness. RaphaelsMusik® wants to make a contribution and is mainly designed in the native language, to open our mind to the power of the Almighty and our deep feelings to God. Through the meditative expression and the melody repeating it creates a conscious inner peace, which, by prolonged use can lead to a contemplative state. Attention is directed to the inside and a deep relaxation can occur. Through the inner imagination oscillating in the figure eight, the singing and the music will have a calming and harmonizing effect. Depending on the speed of the song, the movement in the figure eight is slower or faster.

We experience the content of the songs and its sounds with our whole being, body, mind and soul. The deliberate sinking of the mind into the heart is caused by the repetition of the words and the rhythm of music. The sung word is a distinctive melody communicated by the language. A sense of calm and contentment will arise. The thinking process is waning, silence returns, the mind rests in the presence of Christ .

"Not I, but Christ lives in me" (Galatians 2, 20)

In addition to the spiritual silence personal devotion to the essence of God is of great importance. In song of praise man can express his devotion and love for God. By developing awareness and distinction man learns to distinguish good from evil and to do the will of God. Through selfless service, compassion, mercy and forgiveness a heart full of love and happiness is established. These elements are the key to eternal love. RaphaelsMusik® as a companion will help you to accept God's guidance and to experience and realize God's healing hands.

The new CD series "Healing Encounter" of RaphaelsMusik® was created in kind collaboration with the Institute for Communication and Brain Research, Günter Haffelder, Stuttgart. The music was recorded at 432 Hz, based on the pitch A, performed with natural musical instruments. By jointly designing, singing and making music we experience satisfaction, joy and confidence.
